

Placing memorials at a gravesite is a timeless tradition. Why should thieves be rewarded for desecrating it?

Let's stop this thoughtless behavior one vase at a time. Introducing ForeverSafe, the quality alternative to theft-prone metal cemetery vases.

The anti-theft cemetery vase that will still be there in the morning.

GRANGER FOREVERSAFE
CEMETERY VASES

ForeverSafe is forever beautiful

Chances are, thieves will steal hundreds of memorials this year from a cemetery near you. Not for the beautiful flower arrangements, but for the scrap value of their containers. And there is almost nothing that can be done to stop them. Almost, but not quite.

What if the vase holding your flowers were as beautiful as bronze or marble but held no interest for thieves? ForeverSafe vases are made of tough polyethylene in a special molding process that replicates the look and texture of metals and stone with no seams or burrs. In fact, they are as tempting as the others—until the thief gets close enough to touch.

Humans aren't the only problem. Sunlight, rain, freezing and thawing gradually take their toll on conventional materials. ForeverSafe products are impervious to the elements and will maintain a beauty that matches the fresh flowers they are meant to hold for generations to come.

No one should have to pay for expensive metal vases, and *keep* paying to replace them year after year. Put the extra money into gorgeous flowers... and keep them ForeverSafe.

ForeverSafe matching base and cannister set (right)

ForeverSafe replacement vase (far right) comes with a custom base plate to fit existing canisters

ForeverSafe vases are visually textured in colors that match popular metals and monument stone
